LOGLINE

Radiant neurologist Katerina has to confront her worst suspicions as she accompanies Yannis, a former well-respected doctor, to identify the victim of a tragic car accident at an off-season seaside resort. Together, but also on her own nightly excursions to a mysterious rustic beach bar, they unravel a haunting tale of love, loss, acceptance and letting go.

SHORT SYNOPSIS

Radiant neurologist Katerina and Yannis, a former well-respected doctor, are heading off to a deserted seaside resort. Silence spreads in the car as they travel across sandy dunes in a windy autumn, matching the less-than-pleasant occasion: Yannis had been called to identify the victim of a tragic accident at the hospital of the small town. When the local policeman informs them that the victim's vehicle had plunged over the parapet of a stone bridge and leads them to the morgue, Katerina sees her worst suspicions confirmed. Together with Yannis, but also on her own nightly excursions to a mysterious, rustic beach bar called Arcadia, they begin to put the pieces of the puzzle together, revealing a haunting story of love, loss, acceptance and letting go.

DIRECTOR'S STATEMENT

Have you ever been haunted by the loss of a love? Does this past love still linger with you, or have you managed to let it go?

ARCADIA is a universal story that we can all connect to, regardless of our backgrounds. We have all been haunted by people – whether dead or alive – in our lives. While many films follow either weird or realistic narrations, ARCADIA charts a different path in between. This fusion of a warm sentimental approach and an intellectual concept could be a new style that I would love to share with you: a high concept with heart.

In mythology, Arcadia is referred to as a lost world of idyllic bliss, serving as a cautionary reminder of the transitory nature of life. It is a kind of magical realm, much like the local otherworldly tavern in the film, where characters from all walks of life meet at night. Is it a dream or reality? Or do they all belong equivalently in the same universe?

In ARCADIA, I am playing with our notions of life and death. It delves into the riskier shores of human loss, ventures into a strange sexual territory, and proposes a poetic dimension highlighting the afterlife as the captured memories of the living people. Eventually, the boundaries between the material and spiritual worlds become blurred, and the film becomes a sensory experience. There, the dream returns, just as pragmatic as reality.

A dreamlike love story of saying goodbye.
